

DWA_04.3 Knowledge Check_DWA4

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

References

- Find it easier now that you can use **const** for all your references than adding **var**, reassigning your references can lead to bugs.

Objects Literal

- Provides a shorter syntax for defining function methods.

Destructuring

- makes it possible to unpack values from arrays into distinct variables.

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

jQuery

Prefix jQuery object variables with a `$`.

Iterators and Generators

Don't use iterators. Prefer JavaScript's higher-order functions instead of loops like `for-in` or `for-of`

Classes & Constructor

Always use `class`. Avoid manipulating `prototype` directly.
